FINANCIAL FACTS.

Summer Duliness Still Prevails on Wall Street.

THE CONDITION OF THE CROPS

Influences the Market-Wheat, Corn and Cotton Promise a Sufficiency to Meet our Own and Foreign Requirements-Industrial Affairs in a Satisfactory Condition.

Special Correspondence of Intelligencer NEW YORK, August 5 .- The week has been more or less & quiet one in Wall street. Men influential in financial affairs are abroad, at the seashore or in the mountains, enjoying their prosperity and calculating upon returning to a season of greater activity during the fail months. Let us consider how far such expectations are justified.

By common consent the course of the market has for years been mainly influenced at this season by crop conditions. It is altogether ten early yet to form any positive opinions as to the final yield of the principal crops; but of wheat, corn and cotton there is every prospect of a sufficiency to meet our wn and foreign requirements. Wheat has been the chief subject of anxiety because of early injuries both at home and abroad. The most conservative es timates indicate a yield this year of not less than 560,000,000 bushels, possi bly more, compared with 675,000,000 last year. In view, however, of the surplus left over from previous crop, it is expected that we shall have available for export at least 200,000,000 bushels. ngainst 222,000,000 bushels last year, which was next to the largest year of wheat exports in our history. It is questionable, therefore, if a larger theat crop would be an advantage; for there is no prospect of serious scarcity in the world's supply, and a second bunger crop might be disastrous to fa meia, if low prices followed.

As to corn, much depends upon the next few weeks; the present outlook being for a crop of over 2,000,000,000 bushels, compared with 1,924,000,000 bushels in 1898. Cotton, according to an average estimate, promises a crop of eleven and one-fourth million bales, or about the same as last year. Thus, while the crop situation affords no basis for extravagant expectations, it cer tainly promises the farmers over a large section of the country results above the average, particularly when the better prices now realized are taken into co sideration. We are at least surof a good foreign demand for our wheat for the second year in success ion. This is all that can be said of the agricultural situation.

Now let us look at industrial conditions. Sufficient consideration has not been accorded the fact that the United States is more under the influence of industrial affairs than ever before. For years it has been the custom of mer hants and bankers to formulate their plans upon the prospects and results of agriculture. Without in any degree wishing to underrate the importance of the latter, it is necessary to keep in sight the wonderful march of industry. We are rapidly passing from an agri cultural into a manufacturing population. In 1880 there were 7,600,000 sons employed in agriculture and 3,400,-000 in manufacturing. In 1890 the totals were 8,400,000 and 5,090,000 respectively. During this ten years the increase in entire population, according to the census, was 25 per cent; the increase in agricultural employments being only 10 per cent, while that in manufacturing was nearly 50 per cent. The next census will certainly show a very much larger development of industry. Figures could be added, showing that agriculture has little more than held its own during the past ten or twenty years, while the mineral and manufacturing industries have doubled and quadrupled their output many times over during the same period. The object of these remarks is to impress upon the reader the importance of the industrial "boom" which the country is now experiencing, It far outweighs in importance in the m total of prosperity any increased benefits that the agricultural situation is likely to offer. In the iron trade and various branches extraordinary conditions prevail. Furnaces and mills are running to their utmost capacity; high prices fall to check demand; large advances have been made in wages; the demand is legitimate, not speculative, and is expected to continue for another year at least. Export orders are frequently refused to satisfy home de-The textile trades are shar ing the improvement; cotton mill building in the south is progressing at an extraordinary rate; and throughout the whole country the wheels of industry are humming at a rate never before ex-

The effect of such conditions upon the security market can easily be determined. It may be said that prices are already high enough; that prosperity has been amply discounted, etc. partly true, yet no serious efforts for materially lower prices can be successful while these conditions continue, and, if prolonged, they will inevitably develop a speculative spirit which so far has been conspicuously absent. is more danger of losses from future speculative excesses than from a de clining market now. The industria The industrial shares are likely to receive much support, regardless of their merit. Whether the attempt to distribute them among the public will succeed or not no one can predict.

The most substantial feature in the stock market is the railroad depart-These securities have tried; their earning capacity is beyond experimental stage; and present prosperity, especially of those running through the grain and manufacturing districts, promises continual large earnings for some time to come.

There is one element of caution in the market, and that is money. Firm rates probable, a result of good times, not fear or adversity. Lenders are look-

ing forward to a 6 per cent market. The probabilities of a squeeze are not seriously discussed; but they are sufficiently possible to act as a wholesome restraint upon speculation. A drop in exchange exerted a favorable effect here; and the prospect of continued large exports of grain, produce and manufactures induces the belief that gold imports will not be long delayed, notwithstanding European opposition. Last year Europe sent us securities instead of gold; but the foreign supply of the former has been so reduced that we are likely to draw the precious metal when wanted. Gold is now armetal when wanted. Gold is now ar-riving from the Klendike and Australia, to say nothing of increasing home production. Except for the money outlook the situation favors higher prices. Powerful interests are supporting the market, expecting renewed outside support in due season. Later on the course of affairs will be much more interesting than at this writing

HENRY CLEWS.

Story of a Slave.

Story of a Slave.

To be bound hand and foot for years by the chains of disease is the worst form of slavery. George D. Williams, of Manchester, Mich, tells how such a slave was made free. He says: "My wife has been so helpless for five years that she could not turn over in bed alone. After using two bottles of Electric Bitters, she is wonderfully improved and able to do her own work." This supreme remedy for female diseases quickly cures nervousness, sleepiessness, melancholy, headache, backache, fainting and dizzy spells. This miracle working medicine is a godsend to weak, sickly, run down people. Every bottle guaranteed. Only 50 cents, Sold by Logan Drug Co., druggist. by Logan Drug Co., druggist.

ALWAYS ask your grocer for Whe ling Bakery Bread. Good. Big. Cheap.

If the Baby is Cutting Teeth

Be sure and use that old and well-tried remedy. Mrs. Winslow's Soothing Syrup for children teething. It soothes the child, softens the gum, allays all pain, cures wind colic and is the best remedy for diarrhoea. Twenty-five cents a bottle.

SWEET, clean and good to eat is the Wheeling Bakery's famous bread.

FINANCE AND TRADE.

The Features of the Money and Stock Markets.

NEW YORK, Aug. 5.-There was not much doing in the stock market to-day. The half holiday on Saturday takes away many active operators on holiday trips. The London exchange was closed and will be again on Monday, thus subtracting an appreciable factor in the usual activity. Nevertheless, the day's dealings were a fairly accurate reflection of speculative opinion on general conditions. There was some disposition to advance prices in the early dealings on account of the uniformly favorable reports of business in all branches contained in the weekly reports of commercial agencies. But this very condition is a factor in the anxiety over the money outlook, which again dominated sentiment as the time approached for the publication of the weekly bank statement. Money is in such large demand that the available supply for the speculative uses is supply for the speculative uses is greatly curtailed. The bank statement, when it appeared, was again weak beyond all expectation.

With forced liquidation in progress at some points in Europe and with a possible demand for money to move the crops, the statement brought selling of stocks and a general sharp decline. St. Paul and Omaha, Pittsburgh, Cincin-nati, Chicago & St. Louis and Kansas City, Pittsburgh & Gulf, however, rose from 1% to 2% per cent. American Smelting and American Car preferred showed some signs of strength. Otherwise the market closed weak and lower

The stock market indicated during the week a disposition to move upwards but was restrained by several condi-tions, most notable of which was the continued anxlety over the future of the market. The money rate through the week held stiffly at about 4 per cent. In spite of the elements of doubt and the absence of a majority of big operators and leading spirits on vacation trips, business has shown notable increase over last week's fig-ures and the average level of prices is This is most notably true in the industrial stocks on account of the great activity and prosperity in all kinds of business, especially the iron and steel industry. Events in the financial world continue to shape themselves toward a higher rate for money for some time to come. There is evidence that in the general tide of prosperity the extension of credit in some quar ters has been on so liberal a scale as to draw down reserves below the point of sufficient security from a conservative standpoint. Thus, the Bank of Eng-land and the continental banks have been struggling to replenish their bulllon reserves. The London money markets loans in Germany are being called The liquidation in Germany home. seems to be going on safely enough but the London withdrawals keep up the Berlin money rate. Government statistics both in Great Britain, Germany and France show a large expansion of trade so that in spite of the replenishment of banking reserves going on at all three centers there is increasing employment for money. In these circumstances the foreign money markets have shown themselves very sensitive to the heavy downward tendency of both sterling and continental exchange at New York based on offerings of exchange bills in the market against coming shipments of grain. Evidently it has entered into the calculations of foreign financiers that money would be so abundant in this country that we could afford to lend the credits established by our export movement of merchandise. The low state of New York banks reserves arouse some anxiety as to whether it will not be necessary to call home our credits which would force sales of securities to avoid ship-ments hither of gold. New York banks

built up the surplus reserve by a los contraction amounting to over \$34,000, 000. New York merchants are selling their paper in other domestic markets and New York waits with some anxiety to know what demands the interior will make upon it for funds to move the crops. The activity in the bond market has been greatest in the speculative issues which have advanced. Changes generally have been small. U. S. 28 and new 4s advanced % per cent in the bid price.

Breadstuffs and Provisions. CHICAGO-Dull and irregular mar

tets prevailed on the board of trade to-Weakness of corn and favorable day. crop conditions were features in a decline of %@%c in wheat. Coarse grains

crop conditions were features in a descillation of \(\frac{4}{3} \) \(\frac{6}{3} \) is in what. Coarse grains showed the most weakness in new crop features, December corn closing \(\frac{4}{3} \) \(\frac{6}{3} \) colored to choice, \(22\) \(\frac{6}{3} \) \(\frac{6}{3} \) colored to choice, \(22\) \(\frac{6}{3} \) \(\frac{6

Corn was weak, though only moder Corn was weak, though only moderately active. There was general selling early on much needed rains in the corn states and the Kansas August crop report, which estimated the yield at 400,000,000 bushels for the state. A good shipping demand was reported. Receipts were 341 cars. Selling of the new crop futures, December and May, was much heavier than of September, and those months were correspondingly weak. September ranged from 20% to 20% c, and closed a shade lower at 30% c. December and May closed about % c lower.

December and May closed about %c lower.

Oats were dull and fairly steady. Weakness of wheat and corn was offset by the rains in the west, which were expected to curtail the movement. Receipts were 355 cars. The cash demand was light. Deferred futures showed the most weakness. September ranged from 19½@19%c and closed a shade higher at 19½@19%c. December and May closed \$\frac{1}{2}\text{cond}\$ (19%c) were heavy and closed at shade higher at 19½@19%c. December and May closed \$\frac{1}{2}\text{cond}\$ (19%c) were. Provisions were heavy and closed at sharp declines. Hog prices were lower. This and the weakness of corn caused liquidation by recent buyers. Packers were sellers and an additional source of weakness. At the close September pork was 12%c lower at \$\$ 59; September lard 7%c lower at \$\$ 59; September lard 7%c lower at \$\$ 59; September lard 7%c lower at \$\$ 57%65 in \$\$40; and September ribs 10c lower at \$\$ 50%65 in \$\$40; and September ribs 10c lower at \$\$ 50%65 in \$\$40; and \$\$40 cars; hogs 34.000 head. Live Stock.

CHICAGO—There was the usual mea-ger Saturday supply of cattle, Not enough were offered to make a market and prices were mostly nominal. The and prices were mostly nominal. The tone was strong, yesterday's prices being obtained for the few cattle sold. Choice drayes of light hogs sold at strong prices, but other grades were weak and generally 5c lower. Light hogs sold at \$4.0664.80, and heavy at \$4.1064.80, and heavy at \$4.1064.80, and heavy at \$4.064.80, and cuits at \$2.0064.410. The market for sheep and lambs was steady and about unchanged. Receipts were light and little was done. Sheep sold at \$2.0656.00 for poor to best losts. Hange sheep brought \$3.5064.25. Lambs sold at \$3.0066.00. Receipts—Cattle 200 head; hogs 13,000 head; sheep 1,000 head.

EAST LIBERTY—Cattle, supply light; prices unchanged. Hogs active and higher; prime melliums and best Yorkers 35 0065 10; fair Yorkers 35 0065 505; plass 34 8564 95; hency hogs 34 9565 60; grassers 34 8564 90; roughs 35 0064 25. Sheep steady; choice wethers 34 8564 90; common 8 2064 90;

CINCINNATI—Hogs active and higher at \$3 9905 00. Cattle steady at \$3 400 5 25. Sheep firm at \$2 25@4 35. Lambs steady at \$4 0006 50.

Dry Goods.

NEW YORK—The usual half holiday duliness has pervaded the market, but without any indications of weakness in any quarter. Re-orders from jobbers form the principal undertone to the market. These requests come from converters in large measure who are using large quantities of cloth. This demand has confirmed the recent advance

in gray cloths which are stiff at the advance. Regular print cloths have continued firm and business at full prices is recorded from various quarters. An influx of buyers is expected next week who are coming with the determination to purchase liberally. Stocks in second hands throughout the country are in admirable shape, and will need a good deal of replenishing to be in readiness for the fall trade. Woolens are firm. Light weight fancies though not formally upon the market are being quoted at prices which show the determination of the manufacturer to secure a living profit on his product. Official prices are expected on the majority of lines not already open during the coming week.

The Bank Statement. NEW YORK—The New York bank statement is unfavorable, and the de-tailed changes as against last Saturday
 talled changes as against are as follows:
 \$2.700.525
